JAMES (JEONGMIN) JO

Software Developer | Web Application Development

📞 (587)-222-8852   @ dev.jamesjo@gmail.com   📍 Calgary, AB, Canada

SUMMARY

Software Developer with expertise in **JavaScript, React, and Node.js**, passionate about building scalable web applications.

Experienced **Scrum Master**, leading Agile workflows and cross-functional teams to deliver high-quality solutions.

Experience in **leadership and teamwork**, with strong **problem-solving skills** applicable to software development.

Permanent Resident of Canada – Authorized to work without sponsorship.

EXPERIENCE

KATEC Hackathon

Task & Time Management App with Interactive Charts   Jan 2025

- **Developed the frontend for a task management feature**, implementing a task input UI and visualizing data using pie charts
- **Collaborated in a 5-member team**, using GitHub for version control and Discord & Zoom for real-time communication
- **Managed strict time constraints** by prioritizing essential features, ensuring a functional product within 2 days
- **Gained valuable experience in frontend-backend integration**, improving efficiency in communicating with Django-based APIs

Team Project - "ExploreX"   Sep 2024

Booking Hotels & Activities Web app

- **Led a 5-member team as Scrum Master**, overseeing project workflow, team communication (Zoom & GitHub), and repository management, including pull request reviews and version control.
- **Developed a booking system for activities**, implementing the frontend using **React, Bootstrap, and CSS**, while improving knowledge of responsive design and grid systems

Team Project - "Want-Some-Coffee"   Jul 2024

Cafe Finder Web app

- **Led a 5-member team as Scrum Master**, managing project workflow, task assignments, and communication to ensure smooth collaboration
- **Designed and implemented the core feature**, integrating **Google Maps API** to allow users to search for nearby coffee shops
- **Managed GitHub repository**, overseeing pull request reviews, issue tracking, and GitHub Projects board to streamline progress tracking
